

Ferguson Learning Center

"Where education meets real-life."

Ferguson Learning Center

"Where education meets life-skills."

E-learning helps students feel safer and more confident with their schooling.

The Ferguson Learning Center is an on-line 6-12th grade school located in Marseilles, Illinois.

We provide high-quality instruction

at an affordable price, integrating traditional education with real-world life skills. Some of the reasons that students would choose FLC include those students:

- ◆ who are concerned with the current pandemic and large classroom sizes
- ◆ who have anxiety or depression where a classroom setting is not an option
- ◆ with medical issues
- ◆ who are victims of bullying
- ◆ who need credits to graduate or have quit high school and need to return.

It is important to note that FLC is not a school for children with behavior issues. Students must have the drive to learn.

FLC is different from most online learning platforms. Our teachers lead classrooms in all core subjects. Our educational strategy expands beyond computers, infusing the concept of life skills through academics. We believe that this better prepares students for college as well as life.

FLC is a non-profit 501c3 that is owned by Angels' House of Illinois.

Keep on Inspiring our Students (Koios)

This is our philosophy for educating students. The term Koios is what we believe to be central to our philosophy. This philosophy was inspired by the Greek mythology titan, Koios.

Also known as Coeus, the Titan god of intelligence, inquisitive minds, or questioning intellects, his name signifies "query" or "questioning." We believe that all learning comes from questioning and being inquisitive.

Our job is to make connections with children and stoke their passion for learning.

Our goal is to engage with the student. We do this by designing programs to keep your child or young adult engaged in learning – teaching real-life skills that intersect with the subjects being taught. Students will also have contact with peers and teachers every day (M-F).

We believe that it takes a village not only to raise but to educate a child. We also work in tandem with parents to help students in life skills for the challenging road ahead.

Our school helps parents play an active role in their child's education.

How do our classes operate?

Every semester, students will receive a Classroom Welcome Pack in the mail. It will contain textbooks, workbooks, and any other item needed for their classes. However, for some classes, classwork will be fulfilled online.

Each student is assigned to a virtual classroom,

to which their parents also have access. This gives parents the opportunity of an inside view of their child's learning experience

Our program includes fun, educational activities that parents can enjoy together with their students.

and what lessons are being taught.

Each class will have scheduled sessions for online instruction. Students are required to join those classes virtually. Joining the

VC (virtual class) is necessary for students to experience and enhance their learning. They will be able to see their teachers as well as peers.

Together with our classes, students will have the opportunity to participate in relevant and fun activities, enhancing their learning experience. These activities are perfect for the family to participate. This helps with the students' confidence. It is an excellent opportunity for parents to show their children how important their education is to them.

Although we encourage active participation in the classroom discussions, we also recognize that active discussions for some students can be a challenge. For this reason, we require students to be active listeners and give them the opportunity to relate information via chat or email.
